Autentikasi

Semua endpoint di bawah memerlukan header:

```
Authorization: Bearer {token}
```

Token diperoleh dari endpoint `POST /api/auth/login`.

Role & Akses

Fitur	mahasiswa	dosen	admin	manager
Buat pengajuan TA mandiri	✓	✗	✗	✗
Hapus pengajuan TA (sementara)	✓	✗	✗	✗

    ...

```

Alur Kerja Sistem

Jalur 1 — Pengajuan Mandiri

```

Mahasiswa buat TA (POST /student/thesis)
  → Pilih dosen (GET /student/thesis/lecturers)
  → Ajukan ke dosen (POST /student/thesis/{id}/request-lecturer)      maks 4 permintaan
aktif
  → thesis_lecturer: status = pending
  → Dosen approve (PATCH /lecturer/thesis/requests/{id}/approve)    maks 2 dosen accept
  → thesis_lecturer: status = accepted
  → thesis_supervisors: record baru dibuat otomatis
  → student_thesis: status = on_progress

```

Jalur 2 — Pilih Topik Dosen

```

Dosen buat topik (POST /lecturer/thesis/topics)
  → Dosen publikasikan (PATCH /lecturer/thesis/topics/{id}/publish)
    → thesis_topics: status = available
  → Mahasiswa lihat & pilih (POST /student/thesis/topics/{topicId}/select)
    → student_thesis: dibuat otomatis dari data topik
    → thesis_lecturer: status = pending (ke dosen pemilik topik)      ← dihitung sbg 1
dari 4
  → Dosen approve (PATCH /lecturer/thesis/requests/{id}/approve)    maks 2 dosen accept
    → thesis_lecturer: status = accepted
    → thesis_supervisors: record baru dibuat otomatis

```

- student_thesis: status = on_progress
- thesis_topics: status = taken (jika quota habis)

Jalur 3 — Monitoring Konsultasi

Dosen lihat mahasiswa bimbingan (GET /lecturer/thesis/supervisees)
→ Dosen input konsultasi (POST /lecturer/thesis/consultations)
→ consultations: record baru (status default: on_going)
→ Notifikasi otomatis dikirim ke mahasiswa
→ Mahasiswa lihat riwayat (GET /student/thesis/consultations)

⚠ Dosen yang mengatur jadwal dan menambahkan catatan konsultasi. Status konsultasi hanya `on_going` atau `finished`.

Notifikasi Otomatis

Sistem mengirimkan notifikasi secara otomatis pada event berikut:

Event	Penerima	Tipe Push	Tabel notifications
Mahasiswa ajukan permintaan	Dosen	✓	id_thesis_lecturer diisi
Mahasiswa pilih topik dosen	Dosen	✓	id_thesis_lecturer diisi
Dosen approve permintaan	Mahasiswa	✓	id_thesis_lecturer diisi
Dosen reject permintaan	Mahasiswa	✓	id_thesis_lecturer diisi
Dosen input konsultasi	Mahasiswa	✓	id_notification saja

Notifikasi bimbingan dapat diambil melalui `GET /api/notifications` dengan field `id_thesis_lecturer` terisi.

Aturan Kuota Pembimbing

Sistem menerapkan dua batasan kuota yang saling berkaitan:

Kuota Pengajuan Permintaan (Sisi Mahasiswa)

Aturan	Nilai
Maks permintaan aktif per TA	4 dosen
Yang dihitung sebagai "aktif"	Status pending atau accepted
Yang tidak dihitung	Status rejected

Mahasiswa yang mendapat penolakan (`rejected`) dari seorang dosen **bebas mengajukan ke dosen lain** selama total request aktif belum mencapai 4. Request via `selectTopic` (pilih topik dosen) dihitung sebagai **1 dari 4** kuota tersebut.

Contoh skenario valid:

Request ke Dosen A → accepted (aktif: 1)
Request ke Dosen B → rejected (aktif: 1, rejected tidak dihitung)
Request ke Dosen C → pending (aktif: 2)
Request ke Dosen D → pending (aktif: 3)
Request ke Dosen E → pending (aktif: 4)
Request ke Dosen F → ❌ 422 (aktif sudah 4, tidak bisa tambah lagi)

Kuota Persetujuan (Sisi Dosen)

Aturan	Nilai
Maks dosen yang dapat menyetujui	2 dosen
Sumber kebenaran	Tabel thesis_supervisors
Perilaku saat kuota penuh	Request pending lain tetap ada, dosen tidak bisa approve

Ketika sudah ada 2 dosen yang menyetujui, sisa request pending dari dosen lain **tidak otomatis ditolak** — statusnya tetap pending. Namun jika dosen tersebut mencoba menyetujui, sistem akan mengembalikan error 422.

Dosen A approve → thesis_supervisors count: 1 ✅
Dosen B approve → thesis_supervisors count: 2 ✅
Dosen C approve → ❌ 422 "Mahasiswa sudah memiliki 2 dosen pembimbing"
Dosen C reject → ✅ Boleh (reject tidak bergantung kuota)

Mahasiswa — Pengajuan TA

Base URL: /api/student/thesis

GET /api/student/thesis

Mengambil data tugas akhir mahasiswa yang sedang login.

Akses: mahasiswa

Response 200 OK (belum ada TA):

```
{
  "status": "success",
  "message": "Mahasiswa belum memiliki pengajuan TA.",
  "data": null
}
```

Response 200 OK (sudah ada TA):

```
{
  "status": "success",
  "message": "Data tugas akhir berhasil diambil.",
  "data": {
    "id_student_thesis": 1,
  }
}
```

```
"id_student": 10,
"id_program": 2,
"id_thesis_topic": null,
"topic": "Kecerdasan Buatan",

    "lecturer": { "id_user_si": 5, "name": "Dr. Budi Santoso" },
    "consultations": []
  }
]
}
```

POST /api/student/thesis

Membuat pengajuan tugas akhir mandiri (judul & proposal diinput sendiri).

Akses: mahasiswa

⚠ Mahasiswa hanya boleh memiliki **satu** pengajuan TA aktif. Jika sudah ada, response 422 .

Body (multipart/form-data):

Field	Type	Required	Keterangan
title_ind	string	✓	Judul dalam Bahasa Indonesia (maks 255 karakter)
title_eng	string	✓	Judul dalam Bahasa Inggris (maks 255 karakter)
topic	string	✗	Bidang/topik penelitian

description	string	✓	Ringkasan / deskripsi proposal
attachment_proposal	file	✗	Berkas proposal (PDF/DOC/DOCX, maks 10 MB)

Response 201 Created :

```
{
  "status": "success",
  "message": "Pengajuan tugas akhir berhasil dibuat.",
  "data": {
    "id_student_thesis": 3,
    "id_student": 10,
    "id_program": 2,
    "id_thesis_topic": null,
    "topic": "Kecerdasan Buatan",
    "title_ind": "Implementasi Machine Learning...",
    "title_eng": "Machine Learning Implementation...",
    "status": "proposing",
    "description": "Penelitian ini bertujuan...",
    "attachment_proposal": "thesis/proposals/xyz789.pdf",
    "created_at": "2026-03-11T10:00:00.000000Z",
    "updated_at": "2026-03-11T10:00:00.000000Z"
  }
}
```

Response 422 Unprocessable Entity (sudah punya TA):

```
{
  "status": "error",
  "message": "Anda sudah memiliki pengajuan tugas akhir."
}
```

PUT /api/student/thesis/{id}

Memperbarui pengajuan tugas akhir. Hanya bisa dilakukan selama status masih `proposing` .

Akses: mahasiswa

Path Params:

Param	Tipe	Keterangan
id	integer	ID student_thesis

Body (multipart/form-data): Sama seperti POST, semua field bersifat opsional. File baru akan menggantikan file lama.

Response 200 OK :

```
{
  "status": "success",
```

```
"message": "Pengajuan tugas akhir berhasil diperbarui.",
"data": { ... }
}
```

Response 422 Unprocessable Entity :

```
{
  "status": "error",
  "message": "Hanya pengajuan berstatus proposing yang dapat diubah."
}
```

DELETE /api/student/thesis/{id}

Menghapus data tugas akhir mahasiswa (fitur sementara).

Akses: mahasiswa

⚠️ Endpoint ini bersifat sementara dan tidak melakukan validasi status. Semua data terkait (thesis_lecturers, supervisors, consultations) yang terikat melalui cascade akan ikut terhapus.

Path Params:

Param	Tipe	Keterangan
id	integer	ID student_thesis

Response 200 OK :

```
{
  "status": "success",
  "message": "Data tugas akhir berhasil dihapus."
}
```

GET /api/student/thesis/lecturers

Mengambil daftar seluruh dosen aktif yang dapat dijadikan pembimbing.

Akses: mahasiswa

Response 200 OK :

```
{
  "status": "success",
  "message": "Daftar dosen berhasil diambil.",
  "data": [
    {
      "id_user_si": 5,
      "name": "Dr. Budi Santoso",
      "username": "budi.santoso",
      "email": "budi@ugn.ac.id",
      "id_program": 2,

```

```

    "staff_profile": {
      "id_user_si": 5,
      "full_name": "Dr. Budi Santoso, M.Kom.",
      "employee_id_number": "197501012005011001",
      "position": "Lektor Kepala"
    }
  }
]
}

```

POST /api/student/thesis/{id}/request-lecturer

Mengirimkan permintaan bimbingan ke dosen.

Akses: mahasiswa

Aturan Kuota:

- Mahasiswa dapat mengajukan ke **maksimal 4 dosen** (dihitung dari request berstatus `pending` atau `accepted`)
- Request yang berstatus `rejected` tidak dihitung — mahasiswa bebas ajukan ke dosen lain sebagai pengganti
- Jika memilih topik dosen via `selectTopic` , request ke dosen pemilik topik dihitung sebagai 1 dari 4

Path Params:

Param	Tipe	Keterangan
id	integer	ID student_thesis

Body (`application/json`):

Field	Tipe	Required	Keterangan
id_lecturer	integer	✓	ID dosen yang dituju (must be role = dosen)
student_note	string	✗	Pesan/catatan dari mahasiswa (maks 1000 karakter)

Response 201 Created :

```

{
  "status": "success",
  "message": "Permintaan pembimbing berhasil dikirim.",
  "data": {
    "id_thesis_lecturer": 4,
    "id_student_thesis": 3,
    "id_lecturer": 5,
    "status": "pending",
    "student_note": "Saya tertarik dengan topik AI yang Bapak kuasai.",
    "rejection_note": null,
    "created_at": "2026-03-11T10:05:00.000000Z",
    "updated_at": "2026-03-11T10:05:00.000000Z",
    "lecturer": { "id_user_si": 5, "name": "Dr. Budi Santoso" }
  }
}

```

```
}  
}
```

Response 422 (duplikasi permintaan ke dosen yang sama):

```
{  
  "status": "error",  
  "message": "Anda sudah memiliki permintaan aktif ke dosen ini."  
}
```

Response 422 (kuota 4 permintaan aktif sudah penuh):

```
{  
  "status": "error",  
  "message": "Anda hanya dapat mengajukan permintaan ke maksimal 4 dosen pembimbing."  
}
```

💡 Sistem otomatis mengirim notifikasi + push notification ke dosen tujuan.

GET /api/student/thesis/requests

Mengambil riwayat seluruh permintaan pembimbing yang pernah dikirim.

Akses: mahasiswa

Response 200 OK :

```
{  
  "status": "success",  
  "message": "Riwayat permintaan pembimbing berhasil diambil.",  
  "data": [  
    {  
      "id_thesis_lecturer": 4,  
      "id_student_thesis": 3,  
      "id_lecturer": 5,  
      "status": "accepted",  
      "student_note": "...",  
      "rejection_note": null,  
      "created_at": "2026-03-11T10:05:00.000000Z",  
      "updated_at": "2026-03-11T12:00:00.000000Z",  
      "lecturer": { "id_user_si": 5, "name": "Dr. Budi Santoso", "email": "budi@ugn.ac.id" }  
    }  
  ]  
}
```

Mahasiswa — Topik TA dari Dosen

GET /api/student/thesis/topics

Mengambil daftar topik TA yang dipublikasikan dosen (status `available`).

Akses: mahasiswa

Query Params (optional):

Param	Tipe	Default	Keterangan
my_program	boolean	true	true = hanya topik dari program studi sendiri; false = semua program

Response 200 OK :

```
{
  "status": "success",
  "message": "Daftar topik TA tersedia berhasil diambil.",
  "data": [
    {
      "id_thesis_topic": 2,
      "id_lecturer": 5,
      "id_program": 2,
      "topic": "Kecerdasan Buatan",
      "title_ind": "Sistem Rekomendasi Berbasis Collaborative Filtering",
      "title_eng": "Recommendation System Based on Collaborative Filtering",
      "status": "available",
      "description": "Penelitian terkait sistem rekomendasi menggunakan ...",
      "quota": 2,
      "created_at": "2026-03-10T08:00:00.000000Z",
      "updated_at": "2026-03-10T08:00:00.000000Z",
      "lecturer": { "id_user_si": 5, "name": "Dr. Budi Santoso" },
      "program": { "id_program": 2, "name": "Teknik Informatika" }
    }
  ]
}
```

GET /api/student/thesis/topics/{id}

Mengambil detail satu topik TA yang tersedia.

Akses: mahasiswa

Path Params:

Param	Tipe	Keterangan
id	integer	ID thesis_topic

Response 200 OK :

```
{
  "status": "success",
  "message": "Detail topik TA berhasil diambil.",
  "data": {
```

```

    "id_thesis_topic": 2,
    "topic": "Kecerdasan Buatan",
    "title_ind": "Sistem Rekomendasi Berbasis Collaborative Filtering",
    "title_eng": "Recommendation System Based on Collaborative Filtering",
    "status": "available",
    "description": "Penelitian terkait ...",
    "quota": 2,
    "lecturer": { "id_user_si": 5, "name": "Dr. Budi Santoso" },
    "program": { "id_program": 2, "name": "Teknik Informatika" }
  }
}

```

Jika topik tidak berstatus `available`, response `404 Not Found`.

POST `/api/student/thesis/topics/{topicId}/select`

Memilih topik TA dari dosen. Sistem otomatis membuat `student_thesis` dan mengirim permintaan bimbingan ke dosen pemilik topik.

Akses: mahasiswa

⚠ Mahasiswa yang sudah memiliki TA aktif tidak dapat memilih topik lagi.

💡 Permintaan yang dibuat otomatis ke dosen pemilik topik dihitung sebagai **1 dari 4** kuota pengajuan permintaan.

Path Params:

Param	Tipe	Keterangan
topicId	integer	ID thesis_topic

Body (`multipart/form-data`):

Field	Tipe	Required	Keterangan
student_note	string	✗	Pesan ke dosen (maks 1000 karakter)
attachment_proposal	file	✗	Berkas proposal awal (PDF/DOC/DOCX, maks 10 MB)

Response `201 Created` :

```

{
  "status": "success",
  "message": "Topik TA berhasil dipilih. Permintaan bimbingan telah dikirim ke dosen.",
  "data": {
    "id_student_thesis": 4,
    "id_student": 10,
    "id_program": 2,
    "id_thesis_topic": 2,
    "topic": "Kecerdasan Buatan",
    "title_ind": "Sistem Rekomendasi Berbasis Collaborative Filtering",
    "title_eng": "Recommendation System Based on Collaborative Filtering",
  }
}

```

```
"status": "proposing",
"description": "...",
"attachment_proposal": null,
"thesis_topic": {
  "id_thesis_topic": 2,
  "topic": "Kecerdasan Buatan",
  "title_ind": "Sistem Rekomendasi Berbasis Collaborative Filtering",
  "title_eng": "Recommendation System Based on Collaborative Filtering"
},
"thesis_lecturers": [
  {
    "id_thesis_lecturer": 5,
    "id_lecturer": 5,
    "status": "pending",
    "lecturer": { "id_user_si": 5, "name": "Dr. Budi Santoso" }
  }
]
}
```

💡 Sistem otomatis mengirim notifikasi + push notification ke dosen pemilik topik.

Mahasiswa — Monitoring Bimbingan

GET /api/student/thesis/supervisors

Mengambil daftar dosen pembimbing yang sudah disetujui beserta seluruh catatan konsultasi.

Akses: mahasiswa

Response 200 OK :

```
{
  "status": "success",
  "message": "Daftar dosen pembimbing berhasil diambil.",
  "data": [
    {
      "id_supervisor": 1,
      "id_student_thesis": 3,
      "id_lecturer": 5,
      "created_at": "2026-03-11T12:00:00.000000Z",
      "lecturer": {
        "id_user_si": 5,
        "name": "Dr. Budi Santoso",
        "username": "budi.santoso",
        "email": "budi@ugn.ac.id"
      },
      "consultations": [
        {
          "id_consultation": 1,
          "consultation_date": "2026-03-15",

```

```
        "subject": "Pembahasan BAB 1",
        "student_notes": "Perlu revisi latar belakang",
        "lecturer_notes": "Bagian latar belakang perlu diperdalam",
        "attachment": null,
        "status": "finished"
    }
]
}
]
```

GET /api/student/thesis/consultations

Mengambil seluruh riwayat konsultasi bimbingan mahasiswa (dari semua pembimbing).

Akses: mahasiswa

Query Params (optional):

Param	Tipe	Keterangan
status	string	Filter status: on_going, finished

Response 200 OK :

```
{
  "status": "success",
  "message": "Riwayat konsultasi berhasil diambil.",
  "data": [
    {
      "id_consultation": 1,
      "id_supervisor": 1,
      "consultation_date": "2026-03-15",
      "start_time": "09:00",
      "end_time": "10:00",
      "location": "Ruang Dosen Lt. 3",
      "subject": "Pembahasan BAB 1",
      "student_notes": "Perlu revisi latar belakang",
      "lecturer_notes": "Bagian latar belakang perlu diperdalam",
      "attachment": null,
      "next_task": "Revisi BAB 1 dan lanjutkan BAB 2",
      "progress": 75,
      "status": "finished",
      "created_at": "2026-03-14T09:00:00.000000Z",
      "updated_at": "2026-03-15T15:00:00.000000Z",
      "supervisor": {
        "id_supervisor": 1,
        "lecturer": { "id_user_si": 5, "name": "Dr. Budi Santoso" }
      }
    }
  ]
}
```

```
]
}
```

Mahasiswa — Kategori Thesis

GET /api/student/thesis/categories

Mengambil daftar semua kategori thesis yang tersedia.

Akses: mahasiswa

Response 200 OK :

```
{
  "status": "success",
  "message": "Daftar kategori thesis berhasil diambil.",
  "data": [
    {
      "id_thesis_category": 1,
      "name": "Kecerdasan Buatan",
      "description": "Penelitian di bidang AI, machine learning, deep learning, NLP, dan computer vision.",
      "created_at": "2026-03-13T10:00:00.000000Z",
      "updated_at": "2026-03-13T10:00:00.000000Z"
    }
  ]
}
```

Dosen — Manajemen Topik TA

Base URL: /api/lecturer/thesis/topics

GET /api/lecturer/thesis/topics

Mengambil seluruh topik TA milik dosen yang sedang login.

Akses: dosen

Response 200 OK :

```
{
  "status": "success",
  "message": "Daftar topik TA berhasil diambil.",
  "data": [
    {
      "id_thesis_topic": 2,
      "id_lecturer": 5,
      "id_program": 2,
      "topic": "Kecerdasan Buatan",
      "title_ind": "Sistem Rekomendasi Berbasis Collaborative Filtering",

```

}
```

POST /api/lecturer/thesis/topics

Membuat topik TA baru (status awal: `draft`).

Akses: dosen

Body (application/json):

Field	Tipe	Required	Keterangan
topic	string	✓	Bidang/area penelitian (maks 255 karakter)
title_ind	string	✓	Judul dalam Bahasa Indonesia (maks 255)
title_eng	string	✓	Judul dalam Bahasa Inggris (maks 255)
description	string	✓	Deskripsi lengkap topik penelitian
quota	integer	✗	Jumlah mahasiswa yang dapat memilih (default: 1)
id_program	integer	✓	ID program studi target

Response 201 Created :

```
{
  "status": "success",
  "message": "Topik TA berhasil dibuat.",
  "data": {
    "id_thesis_topic": 3,
    "id_lecturer": 5,
    "id_program": 2,
    "topic": "Keamanan Siber",
    "title_ind": "Deteksi Intrusi Berbasis Deep Learning",
    "title_eng": "Intrusion Detection Based on Deep Learning",
    "status": "draft",
    "description": "...",
    "quota": 1,
    "created_at": "2026-03-11T09:00:00.000000Z",
    "updated_at": "2026-03-11T09:00:00.000000Z",
    "program": { "id_program": 2, "name": "Teknik Informatika" }
  }
}
```

```
}  
}
```

GET /api/lecturer/thesis/topics/{id}

Mengambil detail satu topik TA beserta daftar mahasiswa yang sudah memilihnya.

Akses: dosen (hanya topik milik sendiri)

Response 200 OK :

```
{  
  "status": "success",  
  "message": "Detail topik TA berhasil diambil.",  
  "data": {  
    "id_thesis_topic": 3,  
    "topic": "Keamanan Siber",  
    "title_ind": "Deteksi Intrusi Berbasis Deep Learning",  
    "status": "available",  
    "quota": 2,  
    "program": { "id_program": 2, "name": "Teknik Informatika" },  
    "student_theses": [  
      {  
        "id_student_thesis": 5,  
        "status": "on_progress",  
        "student": { "id_user_si": 12, "name": "Ahmad Fauzi" }  
      }  
    ]  
  }  
}
```

PUT /api/lecturer/thesis/topics/{id}

Memperbarui topik TA. Hanya bisa dilakukan selama status masih `draft` .

Akses: dosen (hanya topik milik sendiri)

Body (application/json): Sama seperti POST, semua field bersifat opsional.

Response 200 OK : Format sama dengan detail topik.

Response 422 :

```
{  
  "status": "error",  
  "message": "Topik yang sudah dipublikasikan tidak dapat diubah."  
}
```

DELETE /api/lecturer/thesis/topics/{id}

Menghapus topik TA. Hanya bisa dilakukan selama status masih `draft` .

Akses: dosen (hanya topik milik sendiri)

Response 200 OK :

```
{
  "status": "success",
  "message": "Topik TA berhasil dihapus."
}
```

Response 422 :

```
{
  "status": "error",
  "message": "Topik yang sudah dipublikasikan tidak dapat dihapus."
}
```

PATCH /api/lecturer/thesis/topics/{id}/publish

Mempublikasikan topik TA agar dapat dilihat dan dipilih mahasiswa (draft → available).

Akses: dosen

Response 200 OK :

```
{
  "status": "success",
  "message": "Topik TA berhasil dipublikasikan.",
  "data": {
    "id_thesis_topic": 3,
    "status": "available",
    ...
  }
}
```

Response 422 (bukan status draft):

```
{
  "status": "error",
  "message": "Hanya topik berstatus draft yang dapat dipublikasikan."
}
```

PATCH /api/lecturer/thesis/topics/{id}/archive

Mengarsipkan topik TA sehingga tidak lagi tampil ke mahasiswa (available / taken → archived).

Akses: dosen

Response 200 OK :

```
{
  "status": "success",
  "message": "Topik TA berhasil diarsipkan.",
  "data": {
    "id_thesis_topic": 3,
    "status": "archived",
    ...
  }
}
```

Dosen — Validasi & Approval Pengajuan

Base URL: `/api/lecturer/thesis/requests`

GET `/api/lecturer/thesis/requests`

Mengambil seluruh permintaan bimbingan yang masuk ke dosen.

Akses: dosen

Query Params (optional):

Param	Tipe	Keterangan
status	string	Filter: pending, accepted, rejected

Response 200 OK :

```
{
  "status": "success",
  "message": "Daftar permintaan bimbingan berhasil diambil.",
  "data": [
    {
      "id_thesis_lecturer": 4,
      "id_student_thesis": 3,
      "id_lecturer": 5,
      "status": "pending",
      "student_note": "Saya tertarik dengan topik AI.",
      "rejection_note": null,
      "created_at": "2026-03-11T10:05:00.000000Z",
      "updated_at": "2026-03-11T10:05:00.000000Z",
      "student_thesis": {
        "id_student_thesis": 3,
        "title_ind": "Implementasi Machine Learning...",
        "title_eng": "Machine Learning Implementation...",
        "status": "proposing",
        "attachment_proposal": "thesis/proposals/xyz789.pdf",
        "student": {
          "id_user_si": 10,
          "name": "Ahmad Fauzi",

```

```
    "username": "ahmad.fauzi",
    "email": "ahmad@mhs.ugm.ac.id"
  },
  "program": { "id_program": 2, "name": "Teknik Informatika" },
  "thesis_topic": null
}
]
}
```

GET /api/lecturer/thesis/requests/{id}

Mengambil detail satu permintaan bimbingan.

Akses: dosen (hanya request yang ditujukan ke dosen ini)

Response 200 OK : Format sama dengan item di daftar requests.

PATCH /api/lecturer/thesis/requests/{id}/approve

Menyetujui permintaan bimbingan dari mahasiswa.

Akses: dosen

Aturan Kuota:

- Setiap mahasiswa hanya dapat memiliki **maksimal 2 dosen pembimbing** yang menyetujui
- Jika kuota 2 sudah terpenuhi, request yang masih `pending` dari dosen lain tetap ada namun tidak dapat disetujui — dosen yang mencoba approve akan mendapat error `422`

Endpoint ini secara otomatis:

1. Update `thesis_lecturer.status` → `accepted`
2. Insert record baru ke `thesis_supervisors`
3. Update `student_thesis.status` → `on_progress`
4. Cek kuota topik — update status topik ke `taken` jika sudah penuh
5. Kirim notifikasi + push notification ke mahasiswa

Response 200 OK :

```
{
  "status": "success",
  "message": "Permintaan bimbingan berhasil disetujui. Mahasiswa telah ditambahkan ke daftar bimbingan.",
  "data": {
    "id_thesis_lecturer": 4,
    "status": "accepted",
    "student_thesis": {
      "id_student_thesis": 3,
      "status": "on_progress",
      "student": { "id_user_si": 10, "name": "Ahmad Fauzi" },
      "supervisors": [
        {
```

```

        "id_supervisor": 2,
        "id_lecturer": 5,
        "lecturer": { "id_user_si": 5, "name": "Dr. Budi Santoso" }
    }
]
}
}
}
}

```

Response 422 (bukan status pending):

```

{
  "status": "error",
  "message": "Hanya permintaan berstatus pending yang dapat disetujui."
}

```

Response 422 (kuota 2 pembimbing sudah penuh):

```

{
  "status": "error",
  "message": "Mahasiswa ini sudah memiliki 2 dosen pembimbing yang menyetujui. Tidak dapat menambah pembimbing baru."
}

```

PATCH /api/lecturer/thesis/requests/{id}/reject

Menolak permintaan bimbingan dari mahasiswa.

Akses: dosen

Endpoint ini secara otomatis mengirim notifikasi + push notification ke mahasiswa.

Body (application/json):

Field	Type	Required	Keterangan
rejection_note	string	☒	Alasan penolakan (maks 1000 karakter)

Response 200 OK :

```

{
  "status": "success",
  "message": "Permintaan bimbingan berhasil ditolak.",
  "data": {
    "id_thesis_lecturer": 4,
    "status": "rejected",
    "rejection_note": "Kuota bimbingan saya sudah penuh untuk tahun ini.",
    "updated_at": "2026-03-11T11:00:00.000000Z"
  }
}

```

Dosen — Monitoring Bimbingan

GET /api/lecturer/thesis/supervisees

Mengambil seluruh mahasiswa yang sedang dibimbing dosen beserta riwayat konsultasinya.

Akses: dosen

Response 200 OK :

```
{
  "status": "success",
  "message": "Daftar mahasiswa bimbingan berhasil diambil.",
  "data": [
    {
      "id_supervisor": 1,
      "id_student_thesis": 3,
      "id_lecturer": 5,
      "created_at": "2026-03-11T12:00:00.000000Z",
      "student_thesis": {
        "id_student_thesis": 3,
        "title_ind": "Implementasi Machine Learning...",
        "status": "on_progress",
        "student": {
          "id_user_si": 10,
          "name": "Ahmad Fauzi",
          "username": "ahmad.fauzi",
          "email": "ahmad@mhs.ugm.ac.id"
        }
      },
      "program": { "id_program": 2, "name": "Teknik Informatika" }
    },
    {
      "consultations": [
        {
          "id_consultation": 1,
          "consultation_date": "2026-03-15",
          "subject": "Pembahasan BAB 1",
          "status": "finished"
        }
      ]
    }
  ]
}
```

GET /api/lecturer/thesis/consultations

Mengambil seluruh catatan konsultasi dari semua mahasiswa bimbingan.

Akses: dosen

Query Params (optional):

Param	Tipe	Keterangan
status	string	Filter status: on_going, finished
id_supervisor	integer	Filter berdasarkan ID supervisor (satu mahasiswa)

Response 200 OK :

```
{
  "status": "success",
  "message": "Daftar konsultasi berhasil diambil.",
  "data": [
    {
      "id_consultation": 1,
      "id_supervisor": 1,
      "consultation_date": "2026-03-15",
      "subject": "Pembahasan BAB 1",
      "student_notes": "Perlu revisi latar belakang",
      "lecturer_notes": "Bagian latar belakang perlu diperdalam",
      "attachment": null,
      "status": "finished",
      "supervisor": {
        "student_thesis": {
          "student": { "id_user_si": 10, "name": "Ahmad Fauzi" },
          "program": { "id_program": 2, "name": "Teknik Informatika" }
        }
      }
    }
  ]
}
```

POST /api/lecturer/thesis/consultations

Menambahkan catatan/agenda konsultasi bimbingan baru.

Akses: dosen

⚠️ `id_supervisor` harus merupakan record supervisi yang dimiliki dosen yang sedang login.

💡 Sistem otomatis mengirim notifikasi + push ke mahasiswa setelah konsultasi dibuat.

Body (multipart/form-data):

Field	Tipe	Required	Keterangan
id_supervisor	integer	✓	ID record thesis_supervisors (relasi dosen-mahasiswa)
consultation_date	date	✓	Tanggal konsultasi (format: YYYY-MM-DD)
start_time	time	✗	Waktu mulai konsultasi (format: HH:mm)
end_time	time	✗	Waktu selesai konsultasi (format: HH:mm)

location	string	✗	Lokasi konsultasi (maks 255 karakter)
subject	string	✓	Topik/agenda konsultasi (maks 255 karakter)
student_notes	string	✗	Catatan dari sisi mahasiswa
lecturer_notes	string	✗	Catatan dari dosen pembimbing
attachment	file	✗	Lampiran (PDF/DOC/DOCX/JPG/PNG, maks 10 MB)
next_task	string	✗	Tugas selanjutnya untuk mahasiswa
progress	integer	✗	Progress konsultasi (0-100, default: 0)
status	string	✗	Status konsultasi (default: on_going)

Response 201 Created :

```
{
  "status": "success",
  "message": "Catatan konsultasi berhasil ditambahkan.",
  "data": {
    "id_consultation": 2,
    "id_supervisor": 1,
    "consultation_date": "2026-03-20",
    "start_time": "10:00",
    "end_time": "11:00",
    "location": "Ruang Dosen Lt. 3",
    "subject": "Review BAB 2 - Tinjauan Pustaka",
    "student_notes": null,
    "lecturer_notes": "Tambahkan referensi jurnal terbaru",
    "attachment": null,
    "next_task": "Cari minimal 5 jurnal internasional terbaru",
    "progress": 0,
    "status": "on_going",
    "created_at": "2026-03-14T09:00:00.000000Z",
    "updated_at": "2026-03-14T09:00:00.000000Z",
    "supervisor": {
      "student_thesis": {
        "student": { "id_user_si": 10, "name": "Ahmad Fauzi" }
      }
    }
  }
}
```

GET /api/lecturer/thesis/consultations/{id}

Mengambil detail satu catatan konsultasi.

Akses: dosen (hanya konsultasi dari mahasiswa bimbingannya)

Response 200 OK : Format sama dengan item di daftar konsultasi.

PUT /api/lecturer/thesis/consultations/{id}

Memperbarui catatan konsultasi.

Akses: dosen

Body (multipart/form-data): Sama seperti POST, semua field bersifat opsional. File baru menggantikan file lama.

Response 200 OK :

```
{
  "status": "success",
  "message": "Catatan konsultasi berhasil diperbarui.",
  "data": { ... }
}
```

Dosen — Manajemen Kategori Thesis

GET /api/lecturer/thesis/categories

Mengambil daftar semua kategori thesis.

Akses: dosen

Response 200 OK :

```
{
  "status": "success",
  "message": "Daftar kategori thesis berhasil diambil.",
  "data": [
    {
      "id_thesis_category": 1,
      "name": "Kecerdasan Buatan",
      "description": "Penelitian di bidang AI, machine learning, deep learning, NLP, dan computer vision.",
      "created_at": "2026-03-13T10:00:00.000000Z",
      "updated_at": "2026-03-13T10:00:00.000000Z"
    }
  ]
}
```

POST /api/lecturer/thesis/categories

Menambahkan kategori thesis baru.

Akses: dosen

Body (application/json):

Field	Tipe	Required	Keterangan
-------	------	----------	------------

name	string	✓	Nama kategori (maks 255 karakter, unik)
description	string	✗	Deskripsi kategori

Response 201 Created :

```
{
  "status": "success",
  "message": "Kategori thesis berhasil ditambahkan.",
  "data": {
    "id_thesis_category": 9,
    "name": "Cloud Computing",
    "description": "Penelitian di bidang cloud computing dan distributed systems.",
    "created_at": "2026-03-13T10:00:00.000000Z",
    "updated_at": "2026-03-13T10:00:00.000000Z"
  }
}
```

GET /api/lecturer/thesis/categories/{id}

Mengambil detail kategori thesis beserta daftar topik yang menggunakannya.

Akses: dosen

Response 200 OK :

```
{
  "status": "success",
  "message": "Detail kategori thesis berhasil diambil.",
  "data": {
    "id_thesis_category": 1,
    "name": "Kecerdasan Buatan",
    "description": "...",
    "thesis_topics": [
      {
        "id_thesis_topic": 2,
        "topic": "Machine Learning",
        "title_ind": "Sistem Rekomendasi Berbasis Collaborative Filtering",
        "status": "available"
      }
    ]
  }
}
```

PUT /api/lecturer/thesis/categories/{id}

Memperbarui kategori thesis.

Akses: dosen

Body (application/json): Sama seperti POST, semua field bersifat opsional.

Response 200 OK :

```
{
  "status": "success",
  "message": "Kategori thesis berhasil diperbarui.",
  "data": { ... }
}
```

DELETE /api/lecturer/thesis/categories/{id}

Menghapus kategori thesis. Hanya bisa dihapus jika tidak ada topik yang menggunakannya.

Akses: dosen

Response 200 OK :

```
{
  "status": "success",
  "message": "Kategori thesis berhasil dihapus."
}
```

Response 422 (masih digunakan):

```
{
  "status": "error",
  "message": "Kategori tidak dapat dihapus karena masih digunakan oleh topik TA."
}
```

Admin & Manager — Dashboard & Manajemen

Base URL: /api/admin/thesis

Akses: admin , manager

GET /api/admin/thesis/dashboard

Mengambil rekapitulasi statistik modul bimbingan TA.

Response 200 OK :

```
{
  "status": "success",
  "message": "Rekapitulasi dashboard bimbingan TA berhasil diambil.",
  "data": {
    "thesis_by_status": {
      "proposing": 15,
      "on_progress": 42,
      "revision": 8,
      "finished": 30
    },
  },
}
```

```
"total_thesis": 95,
"topics_by_status": {
  "draft": 5,
  "available": 20,
  "taken": 10,
  "archived": 3
},
"total_topics": 38,

  "on_going": 5,
  "finished": 180,
  "rejected": 3
},
"total_consultations": 200
}
}
```

GET /api/admin/thesis/students

Mengambil daftar seluruh pengajuan TA dengan filter dan pagination.

Query Params (optional):

Param	Tipe	Keterangan
status	string	Filter status: proposing, on_progress, revision, finished
id_program	integer	Filter berdasarkan program studi
search	string	Cari berdasarkan judul atau nama mahasiswa
per_page	integer	Jumlah item per halaman (default: 15)

Response 200 OK :

```
{
  "status": "success",
  "message": "Daftar pengajuan TA mahasiswa berhasil diambil.",
  "data": {
    "current_page": 1,
    "data": [
      {
        "id_student_thesis": 3,
        "title_ind": "Implementasi Machine Learning...",
        "title_eng": "Machine Learning Implementation...",
        "status": "on_progress",
        "created_at": "2026-03-11T10:00:00.000000Z",
        "student": {
          "id_user_si": 10,
          "name": "Ahmad Fauzi",

```

```

        "username": "ahmad.fauzi",
        "email": "ahmad@mhs.ugn.ac.id"
    },
    "program": { "id_program": 2, "name": "Teknik Informatika" },
    "thesis_topic": null,

        }
    ]
}
],
"per_page": 15,
"total": 95,
"last_page": 7
}
}

```

GET /api/admin/thesis/students/{id}

Mengambil detail lengkap satu pengajuan TA beserta seluruh riwayat bimbingan.

Path Params:

Param	Tipe	Keterangan
id	integer	ID student_thesis

Response 200 OK :

```

{
    "status": "success",
    "message": "Detail pengajuan TA berhasil diambil.",
    "data": {
        "id_student_thesis": 3,
        "title_ind": "Implementasi Machine Learning...",

          "lecturer_notes": "..."
        }
      ]
    }
  ]
}
```

GET /api/admin/thesis/supervisors

Mengambil daftar seluruh pasangan dosen pembimbing dan mahasiswa bimbingan.

Query Params (opsional):

Param	Tipe	Keterangan
id_lecturer	integer	Filter berdasarkan ID dosen
id_program	integer	Filter berdasarkan program studi

Response 200 OK :

```
{
  "status": "success",
  "message": "Daftar pembimbing berhasil diambil.",
  "data": [
    {
      "id_supervisor": 1,
      "id_student_thesis": 3,
      "id_lecturer": 5,
      "created_at": "2026-03-11T12:00:00.000000Z",

      "program": { "id_program": 2, "name": "Teknik Informatika" }
    }
  ]
}
```

Enum Values

student_thesis.status

Value	Keterangan
proposing	Mahasiswa sudah membuat pengajuan, menunggu dosen
on_progress	Setidaknya satu dosen sudah menyetujui bimbingan
revision	TA sedang dalam proses revisi
finished	TA selesai / lulus

thesis_topics.status

Value	Keterangan
draft	Topik masih dalam penyusunan, belum terlihat mahasiswa
available	Topik sudah dipublikasikan & bisa dipilih mahasiswa
taken	Quota sudah habis, tidak dapat dipilih lagi
archived	Topik diarsipkan oleh dosen

thesis_lecturer.status

Value	Keterangan
pending	Permintaan dikirim, menunggu respons
accepted	Dosen menyetujui bimbingan
rejected	Dosen menolak bimbingan

consultations.status

Value	Keterangan
on_going	Konsultasi sedang berlangsung / dijadwalkan
finished	Konsultasi selesai

Error Responses

401 Unauthorized

}
```

Ringkasan Endpoint

Mahasiswa (role:mahasiswa) — Base URL /api/student/thesis

Method	Endpoint	Keterangan
GET	/	Lihat data TA sendiri
POST	/	Buat pengajuan TA mandiri
PUT	/ {id}	Update pengajuan TA
DELETE	/ {id}	Hapus pengajuan TA (sementara)
GET	/lecturers	Daftar dosen yang bisa dipilih
POST	/ {id}/request-lecturer	Ajukan permintaan ke dosen
GET	/requests	Riwayat permintaan pembimbing
GET	/topics	Daftar topik TA dari dosen
GET	/topics/{id}	Detail topik TA
POST	/topics/{topicId}/select	Pilih topik TA dosen
GET	/categories	Daftar kategori thesis
GET	/supervisors	Daftar pembimbing disetujui
GET	/consultations	Riwayat konsultasi bimbingan

Dosen (role:dosen) — Base URL /api/lecturer/thesis

Method	Endpoint	Keterangan
GET	/topics	Daftar topik TA milik sendiri
POST	/topics	Buat topik TA baru
GET	/topics/{id}	Detail topik TA
PUT	/topics/{id}	Update topik TA (hanya draft)
DELETE	/topics/{id}	Hapus topik TA (hanya draft)
PATCH	/topics/{id}/publish	Publikasikan topik TA

PATCH	/topics/{id}/archive	Arsipkan topik TA
GET	/requests	Daftar permintaan bimbingan masuk
GET	/requests/{id}	Detail permintaan bimbingan
PATCH	/requests/{id}/approve	Setujui permintaan bimbingan
PATCH	/requests/{id}/reject	Tolak permintaan bimbingan
GET	/supervisees	Daftar mahasiswa bimbingan
GET	/consultations	Semua catatan konsultasi
POST	/consultations	Input catatan konsultasi baru
GET	/consultations/{id}	Detail konsultasi
PUT	/consultations/{id}	Update catatan konsultasi
GET	/categories	Daftar kategori thesis
POST	/categories	Buat kategori thesis baru
GET	/categories/{id}	Detail kategori thesis
PUT	/categories/{id}	Update kategori thesis
DELETE	/categories/{id}	Hapus kategori thesis

Admin & Manager (role:admin|manager) — Base URL /api/admin/thesis

Method	Endpoint	Keterangan
GET	/dashboard	Rekapitulasi statistik bimbingan TA
GET	/students	Daftar pengajuan TA (filter + pagination)
GET	/students/{id}	Detail pengajuan TA + riwayat bimbingan
GET	/supervisors	Daftar pasangan dosen-mahasiswa bimbingan
GET	/consultations	Semua catatan konsultasi (filter + pagination)
GET	/topics	Semua topik TA dari seluruh dosen
